

Course Outcome:

BSC (computer science)

F.Y.BSC (CS)

On completion of the course, student will be able to:

- Design and implement 'C' programs for simple problems.
- Understand appropriate use of data types and array structures.
- Understanding basic HTML designing.
- Study various types of semiconductor devices.

S.Y.BSC (CS)

On completion of the course, student will be able to:

- Understand the different methods of organizing large amount of data.
- Efficiently implement the different data structures.
- Compare and chose a process model for a software project development.

T.Y.BSC (CS)

On completion of the course, student will be able to:

- To understand the working of linkers and loaders and other development utilities.
- To understand the design structure of Assembler and macro processor for a hypothetical simulated computer.
- Have a knowledge of regular languages and context free languages.
- Understand issues related to memory allocation.
- Understand types of addresses, data communication.

BBA(CA)

F.Y.B.B.A(CA)

On completion of the course, student will be able to:

- Impart basic accounting knowledge .
- Make students well acquainted with management process , functions and principles.
- Develop an integrative approach where reading, writing, presentation skills are used together to enhance the students' ability to communicate and write effectively.

S.Y.B.B.A(CA)

On completion of the course, student will be able to:

- Study fundamental concepts of RDBMS (PL/Pgsql).
- The Objective of this course is to understand system concepts, to know about software engineering and its application in Software development.
- Explain the difference between object oriented programming and procedural programming.

T.Y.B.B.A(CA)

On completion of the course, student will be able to:

- Know the process of application development using Graphical User Interface (GUI).
- Use Java APIs for program development.

MSC (CS)

F.Y.MSC (CS)

On completion of the course, student will be able to:

- Understand different design strategies.
- Understand the use of data structures in improving algorithm performance.

S.Y.MSC (CS)

On completion of the course, student will be able to:

- Design and implementation of Operating Systems.
- Familiarize the students with the buzz words and technology of mobile communication.
- Understanding cloud computing as a web service.
- Acquire a combination of both Operating Systems & Database Administration skills.

BBA

FYBBA

On completion of the course, students will be able to:

- Make the students aware about various activities of business, business practices and recent trends in business world.
- Study the challenges before the businesses and setting up of a business enterprise.
- Develop the spirit of entrepreneurship among the students.

SYBBA

On completion of the course, students will be able to:

- Make the students aware about the various dynamics of personality development.
- Know the implications of various financial ratios in decision making.
- understand the concept of budgetary control and its application in business

TYBBA

On completion of the course, students will be able to:

- Comprehend applicability of legal principles to situations in Business world by referring to few decided leading cases.
- Provide the students with basic understanding of research process and tools for the same.
- Prepare students for interpretation and analysis of financial statements effectively.

BBA (IB)

FYBBA (IB)

On completion of the course, students will be able to:

- give knowledge about institutional and regulatory framework governing international trade
- Inculcate skills useful to analyze various international business situations.
- understand system and communication and their utility

SYBBA (IB)

On completion of the course, students will be able to:

- Understand key concepts and issues of Production and Operations Management.
- Understand Production Management and its role in developing Business Strategy.
- Enable the students to have a comprehensive understanding of Supply Chain Management.

BCOM

FYBCOM

On completion of the course, students will be able to:

- Know the importance of various taxes & other relevant statutes in day-to-day working of business.
- Prepare the students for becoming an independent businessman or a consultant.
- Prepare students for various competitive examinations.

SYBCOM

On completion of the course, students will be able to:

- Acquaint the students with the new trends in Banking in India & the world.
- Get familiar with day to day banking.
- Know the various aspects of consumer facilities.

TYBCOM

On completion of the course, students will be able to:

- Enable students to understand the process of integration of the Indian Economy with other economics of the world.
- Study the theories of International Trade.
- Acquaint themselves about the concept and principles of Auditing, Audit process, Assurance Standards, Tax Audit, and Audit of computerized Systems.
- Impart knowledge and develop understanding of methods of auditing and their application.
- Acquaint the students with basic principles of International Trade, Theories of International Trade and Dispute resolution mechanism.
- Acquaint the students with the Knowledge about recent changes / developments in commercial laws.
